Sessional Rate for Family Physicians recruited to work in COVID-related services

Following consultations with the NLMA, the Department of Health has introduced a new hourly rate for physicians working in Provincial COVID Assessment Clinics, Testing /Swabbing Sites and Testing Labs across all RHAs. The rate is \$166.67 per hour. This is temporary and intended to provide maximum flexibility in scheduling to meet the demands of these clinics. MCP will advise physicians how to bill the temporary hourly rate for these services in the coming days.
